

Black & White Sire Indexes

World-wide, Daughter Proven

Table - A selection of progeny sampled sire indexes world-wide. Indexes are ranked per country, on the genetic base of that country and according to the total index of that country. For that reason, indexes cannot be compared from one country to the next. All figures with due reservations. TI = total index, HL = longevity, SCS = somatic cell score, FER = fertility.

BODY																

Earlier this summer, Sheri Danhoo Regan from Regancrest Holsteins HI: 'We are using a lot of DNA sires but are closely following the indexes of daughter proven sires, to make sure that we are staying on the right track.' HI is hearing the same from a lot of breeders. As such, while no DNA figures are continually being revealed, progeny proven indexes are extremely valuable, not only as a point of reference, but also because the list provides numerous attractive, useful transmitters with high reliabilities. Take a look for a moment at the brand new August indexes.

JAN BIERMA HAN HOPMAN

ITALY

Already since his debut, sire analyst Gian Ramella has been very enthusiastic about Secretariat, a Uno son of the excellent daughter All.Nure Silky. Secretariat is now fast as the famous race horse after which he was named, although he rose significantly this round and transmits sky-high type. He is among Italy's very highest transmitters. His tip: DNA and daughter proven combined. His conformation is now based on 396 classified daughters. Since April's leader Ramella dropped 380 points (now at 12th place with 2681 PFT) the stable Valverde captured the lead. A notable climber (thanks to the lactations of his daughters) is Chavez with an enormous amount of milk: Italy's very highest based on 340 milking daughters. His dam is Alexander daughter Larcrest Chavonne. Vost the half-sister of Larcrest Crimson. Outcrossed Zamagni disappears from the list; he dropped by 191 points to 2309 PFT. Iota is successful as a sire of sons in Italy; besides the popular Iota he also provided all-rounder Acapulco for the Villa Curta herd.

CANADA

Aikman and Lautrust are stable in Canada, top-3, with Commander joining them. In Canada this grandson of Global Cow Larcrest Crimson appeared as progeny proven in the US, where he now scores 2530 TPI. In Canada, he re-

MANAGEMENT FOR

Standouts!

- **Secretariat: Italy's very highest for tipo: +3.08**
- **Haboro: semi-official Frenchman full of promises**
- **Commander reaches even higher in Canada: #2**
- **Snowboard: intriguing German deserves attention**
- **Popular JoSuper and Rubicon confirm in the US**
- **British Omen unbeatable for 3 years already**

This is the American and ST graduate EDG Rubicon. In April he had 56 daughters, now he has 219, resulting in a gain of 72 points and a top-5 ranking. His dam is the excellent Sandy-Valley Robust Ruby, a daughter of the powerful brood cow Sandy-Valley Sapphire.

out of Spring-Dream Durham Jill. Still dominant for type is the French Atwood son Frist, based on 128 classified daughters.

US

In April, he was 1 daughter short of becoming the official TPI leader, but that problem is now entirely solved with 518 milking and 159 classified daughters. That provided further gains, which makes Delta the world's first progeny proven bull to surpass 2800 TPI. Delta's HI report appeared in June 2017. Welcome high newcomers in America's top-5 are Josuper and Rubicon, who were used heavily as genomic bulls and are now confirming splendidly. Josuper is one of America's top-5 milk bulls, while Rubicon is a fat transmitter par-excellence, in combination with outstanding type. At the same time, Mogul domination in the US is increasing. Besides toppers like Delta, Montross, Rubicon and Yoder, there is now AltaCr (his great grand-dam is Garrett's full sister) and the popular AltaSpring. And, at least as popular, Seagull-Bay Silver, who received sufficient daughters (last time 20, now 314) and nicely maintained his level. Alternative blood is offered by Salvino, but barely any semen is available from this Hunter son. The next bull with alternative blood (and positive type) is Slo-Train AltaCain. He is an all-rounder, scores average for stature and is a son of Morningview Maui (Super-Shottle) out of an Indiana daughter. A careful debut was made by Supershot. With 285 milking daughters (223 US, 62 Canada) he lands 59 points below his April index.

even higher, ending up in 2nd place on the top list, based on 157 Canadian daughters. Epic sons continue to fare splendidly in Canada: Album rose significantly and One Direction is new. His VG-87 Garrett dam traces via several generations back to Goldwyn's dam Braedale Gypsy Grand. The next new Epic son is Oceanic with high type. His dam is the popular donor cow Saphir VG-85, who via various generations traces back to Comestar Model Lady. Recently, HI wrote about the well-known donor cow Co-Vista Atwood Desire (03/2017), now her Mogul son Deman makes a promising Canadian debut, albeit with just 33 daughters. Also new are Salt and Pepper; together in one index release! Because they are from a split embryo, they received precisely the same indexes from CDN. In closing, we mention Gillette, who has no less than 3 bulls with +13 type in the top-40: full brothers Johnson and January (Snowman-Goldwyn) as well as Danger (Epic-MOM).

adds 5. He is the German Nr.2 for kg fat (progeny proven; under Mogul son Murano) and strong for fitness. While Snowboard excels for components, his full brother Snowfall does so for milk. There is a difference of 3 RZG points between them. Also very notable for milk is the Snowman son Schiller, who combines that with strong type. Speaking of type: for a combination of top type and top RZG, Beart remains the highest. When considering only type, then Goldday son Gobi is the highest with 139. This RUW graduate displays 123 RZG.

FRANCE

One of the most fascinating French progeny proven sires is not on the official list. Just like in April when the top bull Delta fell just short of daughters for official status in the US, that is now the case for the extremely interesting Haboro. With 16 daughters, this nearly faultless all-rounder reaches 178 gISU. As a DNA sire, he was used heavily, making it nearly certain that we will hear a lot more about Haboro in the future. He is a son of the Randview son Enziba out of a Thélo daughter. (And with Hora is the second Enziba son in the top-15.) Now to the new French leader, Hammig, who definitely deserves attention. For years he has been one of the most used DNA sires in France – his first 42 daughters prove why. His notably all-round profile made Hammig popular as a DNA sire and that continues to be the case; just the negative components can be identified as the only minus. Hammig is a son of Shadybank Santana (Shottle-Trent) from the following maternal line: Superstition-Stol Joc-Laudan-Addison-Hairybreiz. The next high French newcomer is Hyper. This fitness specialist descends via Man-O-Man, Bolton and Champion

GERMANY

Until recently, Bookem reigned in Germany, but now it looks like Mogul has taken over the role. The German top-15 has no less than 8 Mogul sons, with Masato and Mercury as the highest, both with strong type. However, the absolute German lead remains unchanged in the hands of Bookem son Big Point, now with 3520 daughters. He has been leading since he broke through on the progeny proven list in August 2016. Garvin is Germany's highest newcomer, with 54 daughters. He was bred by Anderstrup Holsteins in Denmark and descends from the deep Grietje family who harvested various successes in Germany. Also deserving attention is the intriguing Snowboard. In April, he rose by 8 points, now he

NETHERLANDS

Delta Danno appears to be unbeatable on the Dutch progeny proven list. With 3636 contributing daughters, he further extends his lead. Making nice gains and new in the top is the fitness transmitter Rocky. His dam (by O-Man son Goli) traces back to Ralma Juror Faith. New is the outcross bull Malcolm RC, a son of the Fidelity son Stellando out of a Ramos daughter. He does carry double O-Man blood, in the third generation.

GREAT BRITAIN

Virtually nowhere in the world are O-Man sons still in the top, but in Great Britain, his son Omen seems unbeatable. Ever since August

Hammig Isy: extremely popular as a young French DNA sire, now the strong French number 1.

2014 he has led the progeny proven list, now with 268 milking daughters. Likely Supershot could surpass him, but this Supersire son does not yet have British daughters in his index. Exciting for December!

SCANDINAVIA

Even though he had to give up some ground, Booth is still the highest son of Shottle son End-Road Beacon. Booth is a son of Koepon Planet Classy, who descends from the well-known Vir-Clar De Classy family. Booth, with 2556 milking daughters, appeared in HI 08/2017 in BullTalk. Odense, by Onside son Opell, appeared new in the top-5 with splendid udder figures.

AUSTRALIA

Topsy, Balisto's full brother who, progeny proven, turns out to be the highest of the duo, now shines in Australia as well. He is followed by Maebull, the world's highest son of Goldwyn son Glenn-Ann Palermo. Maebull, out of Morningview Shottle Lucy EX-90 (Lead Mae family), scores 105 for the trait "Feed Saved", while the 4 other published bulls score negatively.

SPAIN

The Spanish top-5 consists entirely of attractive bulls that are all appreciated by users. Armonico continues as the leader, even though his lead shrunk. This protein bull now has 136 daughters and is complete, except for rump angle. His herd-mate Torrel is an extreme milk transmitter and recorded a strong increase: now 4398 daughters! Niagra son Nissan is a son of the notable O-Man daughter Opsal Frost: good for EX-93 and GMD!

SWITZERLAND

Two newcomers adorn the Swiss top, both with outstanding type. Of them, Tabasco also carries the red factor; his dam is Vidia Ravisante-Red EX-91, born in Switzerland out of a Canadian embryo. Her sire, Shottle son Demello RC, is out of Scientific Debutante Rae. (More in HI shortly.) The other newcomer is also Canadian coloured: Lookout was born via an embryo in Switzerland, is Lavaman's half-brother and has 431 daughters. ●

Polled Table 1 – Selection of DNA tested and available polled sires worldwide. Breeding values ranked by country based on the overall breeding index. No guarantee for accuracy of the values. TI = overall breeding value, HL = longevity, SCS = somatic cell score, FER = fertility.

Sires in the Red Holstein and polled niches do not have it easy. Their chances for a respectable career depend on how they compare to the best overall Holstein sires. But it is a comparison they need to withstand. With the high rate of breeding progress that the breed is undergoing worldwide, it is a real challenge. Whoever wants to become a top sire must present acceptable numbers, especially as RH or polled sires. The summary of the August evaluations show that again, several interesting newcomers have met this challenge, especially in Canada and the USA.

STEPHAN SCHNEIDER

POLLED

The polled sensation for 2017 remains Mardi Sens from the Splendor family. After Jedi sons Whisk and Sammy took over the spots on the polled lists in Canada and the USA, in April, there are now 4 (!!) more high-testers in her to marvel at. One is Boby, a new Nr.2 in the USA. Or Yoda, another son from Sens, who took over the Nr.1 spot in Canada and is supported in the top-10 by Modesty brother Sharks. Not quite as high as interesting is the debut of the Casual brother Jackpot. He is a bull to watch with a close eye on in the coming months. He is tested as homozygous polled and has a very good components, extremely shallow udders and an outstanding fitness profile. The same is true for the extremely balanced Bight, the new polled list leader in the USA. Bight comes from an Eraser daughter out of S-S-I Supersire. Further high newcomers on the international polled lists are Aperol-P-Red (Apoll-Ladd-Bacon) and Mystic-PP (Milford-Bomaz Alright GP-82) in Germany, the new French Nr.2 in the polled list (Bagno-Ladd-Beacon), the Scandianavian Comxa (Commander-Xacobeo-O-Man), a

Red Table 2 – Selection of daughter-proven and DNA tested Red Holstein sire breeding values worldwide. Breeding values ranked by country based on the overall breeding index. No guarantee for accuracy of the values. TI = overall breeding value, HL = longevity, SCS = somatic cell score, FER = fertility.

Eye-catcher!

- Swissbec Yoda, the new Nr.1 polled bull in Canada
- Bight P debuts at Nr.1 in the USA
- Apoll is the sire of the complete top 10 in Germany
- Fools Gold family with red at Nr.1 in Canada
- The new red list leader in the USA: Rusty-Red
- Jackpot-PP – outstanding red debutant Canada

as the two high Swiss debutants Lorin Z P-Red (Bigstar-Delect-Doberman-Mr. Burns-Goldwyn-Lila Z) and Romanus-PP, an interesting homozygous polled Powerball son with Ladd, Toystory, and Goldwyn in the sire stack.

RED HOLSTEIN

The latest evaluation changed little for the list of daughter-proven RH sires. Among the few newcomers is the new Nr.1 in the Netherlands Maxx, although he tested positive on the CDH and apparently has only been used sparingly. More interesting is the Swiss Tibere, a Destry son of the type all-star La Waebera Ralstorm EX-91 and then Glacier Oceanie EX-94.

As usual, there were more highly-rated newcomers after the evaluation on a genomic basis. For example, Canada has a new Nr.1 who has an all-black pedigree and the VRC factor. The Jedi son Eclipse goes back to no other than Stoneden Fools Gold-Red via daughters of Flame, Epic, and MOM. In the USA as well there is a newcomer at the top with an attractive pedigree. Rusty-Red is a Pat son from an Aikman daughter of Morningview Super Roxy EX-90. In Great Britain the new list leader is Aladdin, a grandson of KHW-I Baxter Aika VG-89, while the highest newcomer in Germany, Berlino (Bagno-Go Now-Serano) lands at Nr.2. ●

A breeding star with unusual talent: IHG Mardi Sens 9017 VG-86 has 7 sons in service, of which 5 (Yoda-P, Sharks-P, Bobby-P, Sammy-P and Jackpot PP-Red) qualified for the HI tables after the August evaluations.

BODY																

Red Table 2 – Selection of daughter-proven and DNA tested Red Holstein sire breeding values worldwide. Breeding values ranked by country based on the overall breeding index. No guarantee for accuracy of the values. TI = overall breeding value, HL = longevity, SCS = somatic cell score, FER = fertility.

Eye-catcher!

- Swissbec Yoda, the new Nr.1 polled bull in Canada
- Bight P debuts at Nr.1 in the USA
- Apoll is the sire of the complete top 10 in Germany
- Fools Gold family with red at Nr.1 in Canada
- The new red list leader in the USA: Rusty-Red
- Jackpot-PP – outstanding red debutant Canada

as the two high Swiss debutants Lorin Z P-Red (Bigstar-Delect-Doberman-Mr. Burns-Goldwyn-Lila Z) and Romanus-PP, an interesting homozygous polled Powerball son with Ladd, Toastory, and Goldwyn in the sire stack.

RED HOLSTEIN

The latest evaluation changed little for the list of daughter-proven RH sires. Among the few newcomers is the new Nr.1 in the Netherlands Maxx, although he tested positive on the CDH and apparently has only been used sparingly. More interesting is the Swiss Tibere, a Destry son of the type all-star La Waebra Ralstorn EX-91 and then Glacier Oceanie EX-94. As usual, there were more highly-rated newcomers after the evaluation on a genomic basis. For example, Canada has a new Nr.1 who has an all-black pedigree and the VRC factor. The Jedi son Eclipse goes back to no other than Stoneden Fools Gold-Red via daughters of Flame, Epic, and MOM. In the USA as well there is a newcomer at the top with an attractive pedigree. Rusty-Red is a Pat son from an Aikman daughter of Morningview Super Roxy EX-90. In Great Britain the new list leader is Aladdin, a grandson of KHW-I Baxter Aika VG-89, while the highest newcomer in Germany, Berlino (Bagno-Go Now-Serano) lands at Nr.2. ●

A breeding star with unusual talent: IHG Mardi Sens 9017 VG-86 has 7 sons in service, of which 5 (Yoda-P, Sharks-P, Bobby-P, Sammy-P and Jackpot PP-Red) qualified for the HI tables after the August evaluations.
